Shamanic Healing Weekend Workshop

2009 Website Program Description

An opportunity to explore many different facets of healing including activating healing hands, conscious interaction with non-physical helpers, body scans and removing energies attached to the mental and emotional bodies.

Shamanic Healing is a “hands on” program where participants work with each other to develop experiential wisdom and skills that are practical and applicable in their daily life. For healers and those who want to be healers.

- Register: Not yet scheduled for 2010.
- Very reasonably priced at: $495

(includes meals, lodging, seminar activities, and local transportation)

An opportunity to explore many different facets of healing including activating healing hands, conscious interaction with non-physical helpers, body scans and removing energies attached to the mental and emotional bodies.

Shamanic Healing is a "hands on" program where participants work with each other to develop experiential wisdom and skills that are practical and applicable in their daily life. For healers and those who want to be healers.

From mankind's earliest times there have been medicine men and women who functioned as vision seers and healers both in the spirit world and the physical world. They traveled into the Dreamtime realms of consciousness to directly perceive the energy imbalances that manifested as dysfunctions in the physical body. With the assistance of spirit helpers, the shaman and shamanka learned how to experience the life force essence and direct it to facilitate emotional and physical healing in themselves and others.

Many people reach a point in their personal development where they can feel their desire to alleviate suffering and sense their own healing potentials but are unable to find the support that was once an integral part of earlier societies. This weekend retreat combines the cutting edge technology of Hemispherical Synchronization with multi-cultural shamanic traditions to create a unique opportunity to learn and apply new tools for healing.

This retreat is designed for both the beginner and more advanced explorers of alternative healing. The Shamanic Healing program creates the opportunity to explore, experience and utilize energetic healing processes so that you can become a resource of experiential wisdom both for yourself and others.

During this weekend retreat you will be guided:

- To use vocal sounds for healing mind and body
- To communicate with your inner spirit healer
- To use sage smudging for energy shielding
- To activate your healing hands
- To utilize body scans in perceiving energy blocks
- To remove discordant energy attachments
- To facilitate healing through listening
- To use drumming for trance induction
- To see the aura field around the body
